

## LATEX - SETUP

About Latex: <https://www.latex-project.org/get/>

In order to get started you need to install a Latex distribution and editor based on what operating system you use. Below are the canonical examples for Windows.

Install a Latex distribution: <https://miktex.org/howto/install-miktex>

Install a Latex editor: <http://www.texstudio.org/>

Tutorial for installation with screen shots:
